

Requirements

Mozzarella Bytes | Team 18

Daniel Benison

Elizabeth Hodges

Kathryn Dale

Ravinder Dosanjh

Callum Marsden

Emilien Bevierre

Revised by Daniella Swanepoel

Revised by Adam Lynch

Requirements

Single statement of need: Build a single-player game suitable for prospective students and their guardians to play on open days, that involves moving fire engines between a Fire Station and alien fortresses, avoiding alien patrols on the way, and attacking alien fortresses when the fire engines' water cannons are within shooting range.

The description of the requirements engineering process, elicitation of requirements, requirements change management, validation of requirements, requirement presentation and our use case can be found at:

User requirements

User ID	Description	Source	Priority	
UR_WIN	The player wins if they flood the ET fortresses before the ET fortresses and ET patrols destroy all of the player's fire trucks	Product brief	Shall	
UR_LOSE	The game is lost if all the player's fire trucks have been destroyed before the player has flooded all of the ET fortresses	Product brief	Shall	
UR_MINI_GAME	The game should include a minigame	Product brief	Should	
UR_MINI_GAME_THEME	The minigame should be different in style, but aligned to the theme of the main game	Product brief	Should	
UR_REPAIR	Fire trucks can be repaired and refilled at the fire station	Product brief	Should	
UR_FIRE_TRUCKS	There must be at least four fire trucks	Product brief	Shall	
UR_FORTRESSES	There must be at least six fortresses	Product brief	Should	

UR_SCALABILITY	The game should be able to be played on other platforms	Product brief	May	
UR_PATROLS	There should be at least 2 ET patrols that the user aims to avoid	Product brief	Should	
UR_DESTROY_STATION	At a point in the game the fire station should be destroyed	Product brief	Should	
UR_ENJOYABILITY	The game should be enjoyable to play	Product brief	May	
UR_PLAYABLE	The game must be playable Dependent on environmental assumptions (see bottom of document)	Product brief	Shall	
UR_PLAYER	The game must be a single-player game	Product brief	Shall	
UR_CODE	The game must be coded in Java	Interview	Shall	
UR_PC	It must be a PC game	Interview	Shall	
UR_TRUCK_SPACE	Fire trucks should not drive over each other or be able to occupy the same space.	Email Communication with Customer	Shall	

UR_POWERUP	The player can collect 5 different types of power up over the course of the game	Product brief	Shall	
UR_DIFFICULTY	The player can select different levels of game difficulty	Product brief	Shall	
UR_SAVE	The player can save the game state at any point and resume a saved game later	Product brief	Shall	

Functional requirements

ID	Description	Source	Priority	User ID
FR_FIRE_TRUCKS	Each fire truck must have a unique spec in terms of its speed, amount of damage it can take before being destroyed, the volume of water it can carry, the range and delivery rate of its water cannon	Product brief	Shall	UR_FIRE_TRUCKS
FR_FORTRESS	Each ET fortress must have a unique spec in terms of the range of its defensive weapons, the amount of damage these weapons can deal to Fire trucks over a period of time,	Product brief	Should	UR_FORTRESS

	and the volume of water it takes to flood			
FR_WATER	Over time the amount of water needed to flood a fortress should increase	Interview	Should	UR_WIN
FR_MOBILITY	The user can move the fire trucks. Patrols and fire engines should be	Product brief	Shall	UR_PLAYABLE

	mobile; fortresses should be immobile			
FR_AI	The ET patrols and ET fortresses are controlled by the computer AI	Product brief	Shall	UR_PLAYER
FR_TRUCK_ATTACK	Fire trucks can flood ET fortresses	Product brief	Shall	UR_FIRE_TRUCKS
FR_PATROL_ATTACK	ET patrols can attack trucks	Product brief	Shall	UR_PATROLS
FR_FORTRESSES_ATTACK	ET fortresses attack trucks	Product brief	Shall	UR_FORTRESS
FR_VIEW_TIMER	The player must see the amount of time until the fire station is destroyed	Interview	Should	UR_DESTROY_STATION
FR_PATROL_INCREASE	The number of patrols should increase throughout the game	Interview	Should	UR_PATROLS
FR_PATROL_DAMAGE	Patrols should damage fire trucks that enter a predefined circumference around them, however the damage should be to a lesser extent than the fortresses	Interview	Should	UR_PATROLS
FR_PATROL_SIGHT	Patrols should chase fire trucks that are within their range of sight	Interview	May	UR_PATROLS
FR_ACCESS_MINIGAME	The mini game should be accessed from within the main game	Interview	Should	UR_MINI_GAME
FR_CONTROLS	There should be a screen that explains the controls	Interview	May	UR_PLAYABLE
FR_STATION_DESTROY	Fire trucks cannot be repaired or refilled after the fire station has been destroyed	Product brief	Should	UR_DESTROY_STATION
FR_MENU	There should be a menu screen from which the user has the option to start the game, see the controls or quit.	Email Communication with Customer	May	UR_PLAYABLE
FR_GAME_OVER	There should be a 'game over' screen once the game is ended telling the player if the game is won or lost.	Email Communication with Customer	May	UR_ENJOYABILITY

FR_SOUND	There could be sound effects with the game	Email Communication with Customer	May	UR_ENJOYABILITY
FR_SOUND_OFF	If there are sound effects, it should be possible to turn these off	Email Communication with Customer	Shall	UR_ENJOYABILITY
FR_ANIMATION	The fortresses and fire trucks should change appearance as they are destroyed	Email Communication with Customer	Should	UR_ENJOYABILITY
FR_REPAIR_REFILL	The fire trucks should repair and refill when at the fire station	Product Brief	Shall	UR_REPAIR

FR_INVINCIBILITY	When a fire truck collects the invincibility power up that fire truck is unable to take damage from towers for 1 minute	Product brief	Shall	UR_POWERUP
FR_SPEED	When a fire truck collects the speed power up that fire truck moves at an increased speed for 1 minute	Product brief	Shall	UR_POWERUP
FR_DAMAGE	When a fire truck collects the damage power up that fire truck deals increased damage for 1 minute	Product brief	Shall	UR_POWERUP
FR_HEALTH_POWERUP	When a fire truck collects the health power up that fire truck has some health restored instantly	Product brief	Shall	UR_POWERUP
FR_WATER_POWERUP	When a fire truck collects the water power up that fire truck has some water refilled instantly	Product brief	Shall	UR_POWERUP
FR_SINGLE_PICKUP	When a power-up has been collected it disappears and is not able to be collected from that spot until it respawns	Product brief	Shall	UR_POWERUP
FR_FORTRESS_DAMAGE_DIFFICULTY	When the difficulty increases the base damage of the fortresses increase	Product brief	Shall	UR_DIFFICULTY

FR_FORTRESS_UPGRADE_DIFFICULTY	When the difficulty increases the time between fortress upgrades decreases	Product brief	Shall	UR_DIFFICULTY
FR_DIFFICULTY_EASY	When choosing difficulty user can choose Easy which will make the game very simple and easily completable	Product brief	Shall	UR_DIFFICULTY
FR_DIFFICULTY_MEDIUM	When choosing difficulty user can choose Easy which will make the game very competitive and will require the user to play a couple of times before winning	Product brief	Shall	UR_DIFFICULTY
FR_DIFFICULTY_HARD	When choosing difficulty user can choose Hard which will make the game difficult for the user and will require them to be very familiar with the game to beat it.	Product brief	Shall	UR_DIFFICULTY
FR_MULTIPLE_SAVES	The user can make multiple separate saves	Customer communication	Shall	UR_SAVE

Non-functional requirements

ID	Description	Rational	Fit criteria	User ID
NF_PC	The game must be playable on engines/things that can be played on PC	Product brief	The game must use libraries /function that could be used on other platforms	UR_PLAYABLE
NF_RESPONSE	The game must respond quickly to user input	Improved user experience	Average response time >1 second, maximum response time >2 second	UR_ENJOYABILITY
NF_CONTROLS	The controls should be easy to learn	Prospective students should be able to play the game	The player should be able to grasp the controls in under 2 minutes	UR_ENJOYABILITY

*Environmental assumptions:*1) The player is assumed to be playing on a modern computer that is of reasonable specifications. 2) The user will have standard hardware such as a keyboard and mouse. 3) The user will have java installed to run the program.

Risks: The main risks relevant to the requirements are R4 & R7 (see risk assessment table in risk management section).

Use Cases:

Use case 1:

- Name: "FortressDestroy"
- Context: The user destroys a fortress
- Primary Actor: The user
- Stakeholders: Us - with our interests being the user enjoying the game
- Precondition: The system is working as intended
- Minimal Postcondition: The fortress disappears
- Trigger: The fortress health becomes 0
- Main Success Scenario: 1.The user attacks a fortress using a fire truck
 - 2.The fortress health depletes
 - 3.The fortress health becomes 0
 - 4.The fortress disappears
- Secondary scenarios:
 - The fortress's health doesn't deteriorate, leading to the user being unable to destroy it
 - The fire truck does not attack the fortress, leading to the game being unplayable
- Success Postcondition: The user enjoyed attacking the fortress (UR_ENJOYABILITY) and the fortress was successfully destroyed by the user flooding it with a fire truck (FR_TRUCK_ATTACK).

Use case 2:

- Name: "Win"
- Context: The user destroys all fortresses (see Use Case 1) before all of their fire trucks have been destroyed
- Primary Actor: The user
- Stakeholders: Us - with our interests being the user enjoying the game
- Precondition: The system is working as intended
- Minimal Postcondition: The user destroys all the fortresses
- Trigger: The user destroys the last fortress
- Main Success Scenario: 1.The user destroys the last fortress
 - 2.The win state is displayed
 - 3.The game ends
 - 4.Goes back to the game menu
- Secondary scenarios:
 - 2.1 The game continues to run as if the end isn't reached, e.g the fire station timer continues to run so the fire station is destroyed
 - 4.1 The game starts again
- Success Postcondition: The user enjoyed the game (UR_ENJOYABILITY) and did not find it too easy
